**Importance:** High

Sorry, this was the response to Mr. Mosher back in June, but I may not have forwarded it to Tina for inclusion in the report.

Dear Mr. Mosher,  
Thank you for bringing the sprinkler situation to our attention. With the construction project we seem to be having continual glitches with the sprinklers. I will contact the landscapers today and ask them to adjust the timer in that area.

Subject: Watering of bicycles at Central Library  
Comments:

The sprinklers on the lawn at the Central Library (the one with the flagpole), including those adjacent to the bicycle racks appear to be set to operate at around 9 am. Although sometimes referred to as a "green" technology, bicycles actually do not require regular watering.

Since visitors to the Central Library (some hopefully coming by bicycle) have been known to arrive as early as 8 am to attend meetings in the Friends Room, it would seem to me both water-wise and more bicycle-friendly to set the sprinklers so they end their cycle before that time.

Thank you,
