**Index Comparison
for the Month Ended
Mar. 31, 2015**

*Compared to 1-3 yr Gov./Corp Index

For the Month Ended

Mar. 31, 2015

- ❖ Job growth was weaker than expected in March with nonfarm payrolls up 126,000, well below the consensus forecast of 245,000. The unemployment rate was unchanged at 5.5%, though the labor participation rate declined to 62.7% from 62.8%. Wages rose 0.3% (higher than expected). Unfavorable weather and the strong dollar were likely factors for weak job growth in March. The yield on the two-year Treasury note increased in February. Downward pressure on yields fueled by global economic concerns (and the subsequent flight to quality) eased during the month.
- ❖ The Federal Open Market Committee (FOMC) left policy rates unchanged at its March 17-18 meeting, without any dissenting votes. The Committee noted economic activity moderated and the inflation rate declined further. The word “patient” (with regard to the timing of a potential future rate hike) was removed from the policy statement, but the Committee indicated a rate hike at the next FOMC meeting in April is unlikely. U.S. crude oil futures rose for the first month since June 2014 but remained below \$50. The spread between U.S. and Brent crude widened to \$12.8, pushed apart by rising inventories of U.S. crude and higher global demand for Brent.
- ❖ The yield on the two-year Treasury note decreased in March. Domestic economic data has recently softened, and the timing of the first fed funds rate hike remains unclear.
- ❖ Existing home sales decreased in March by 0.2% to an annualized pace of 4.59 million, down from an annualized rate of 4.6 million in February. Fewer available properties, rising property values and still-tight credit continued to be hurdles for some customers including younger and first-time buyers.

* The Transaction Detail/Trading Activity reports provide our most up-to-date transactional details. As such, these reports are subject to change even after the other reports on the website have been locked down. While these reports can be useful tools in understanding recent activity, due to their dynamic nature we do not recommend using them for booking journal entries or reconciliation.

- ❖ **Accrued Interest** - The interest that has accumulated on a bond since the last interest payment up to, but not including, the settlement date. Accrued interest occurs as a result of the difference in timing of cash flows and the measurement of these cash flows.
- ❖ **Amortized Cost** - The amount at which an investment is acquired, adjusted for accretion, amortization, and collection of cash.
- ❖ **Average Credit Rating** - The average credit worthiness of a portfolio, weighted in proportion to the dollar amount that is invested in the portfolio.
- ❖ **Convexity** - The relationship between bond prices and bond yields that demonstrates how the duration of a bond changes as the interest rate changes.
- ❖ **Credit Rating** - An assessment of the credit worthiness of an entity with respect to a particular financial obligation. The credit rating is inversely related to the possibility of debt default.
- ❖ **Duration** - A measure of the exposure to interest rate risk and sensitivity to price fluctuation of fixed-income investments. Duration is expressed as a number of years.
- ❖ **Fair Value** - The price that a given property or asset would fetch in the open marketplace.
- ❖ **Income Return** - The percentage of the total return generated by the income from interest or dividends.
- ❖ **Market Value** - An assets fair value plus any accrued interest.
- ❖ **Original Cost** - The original cost of an asset takes into consideration all of the costs that can be attributed to its purchase and to putting the asset to use.
- ❖ **Par Value** - The face value of a bond. Par value is important for a bond or fixed-income instrument because it determines its maturity value as well as the dollar value of coupon payments.
- ❖ **Price Return** - The percentage of the total return generated by capital appreciation due to changes in the market price of an asset.
- ❖ **Purchase Yield** - The measure of a bond's recurring realized investment income that combines both the bond's coupon return plus it amortization.
- ❖ **Total Return** - The actual rate of return of an investment over a given evaluation period. Total return is the combination of income and price return.
- ❖ **Unrealized Gains/(Loss)** - a profitable/(losing) position that has yet to be cashed in. The actual gain/(loss) is not realized until the position is closed. A position with an unrealized gain may eventually turn into a position with an unrealized loss, as the market fluctuates and vice versa.
- ❖ **Weighted Average Effective Maturity** – The average time it takes for securities in a portfolio to mature, taking into account the possibility that any of the bonds might be called back to the issuer.
- ❖ **Weighted Average Life** - The average number of years for which each dollar of unpaid principal on an investment remains outstanding, weighted by the size of each principal payout.
- ❖ **Weighted Average Maturity** - The average time it takes for securities in a portfolio to mature, weighted in proportion to the dollar amount that is invested in the portfolio. Weighted average maturity measures the sensitivity of fixed-income portfolios to interest rate changes.
- ❖ **Yield** - The income return on an investment. This refers to the interest or dividends received from a security and is expressed as a percentage based on the investment's cost and its current market value.
- ❖ **Yield to Maturity at Cost (YTM @ Cost)** - The internal rate of return anticipated on a bond if held until the end of its lifetime.
- ❖ **Yield to Maturity at Market (YTM @ Market)** - The internal rate of return of a bond adjusted for any capital gains or losses the price represents relative to the current market value.
