

Workplace Fire Safety

Every year in the United States there are 16,500 office and store fires that cause over \$932 million in direct property damage.

Here are some tips to help prevent workplace fires, keep workers safe and keep businesses open.

Employees should:

- Eliminate fire hazards:
- Check for damaged or overloaded electrical outlets, cords and cables.

- Keep anything that can burn away from electrical equipment.
- Never leave portable heating devices unattended.

Employers need to prepare for emergencies:

Make sure smoke alarms and fire sprinklers are properly installed and working.

Post clear fire escape plans on every level of a building.

Teach employees about exit locations, escape routes, and fire protection equipment.

If there is a fire:

Call 911.

Notify co-workers of the fire.

Never use the elevator. Walk, don't run, down the stairs.

If you can't evacuate, remain calm. Seal door gaps with jackets and wait at the window.
