

LANDSCAPE TYPOLOGIES - HARDSCAPE

VISION

The landscape typologies for the site are inspired by the natural forms of the site layout and the built forms of the building. These forms contrast with each other while the hardscape materials unifies them by extending the materials from the building envelope in to the activity gardens within the ground plane.

THE INTEGRATED APPROACH

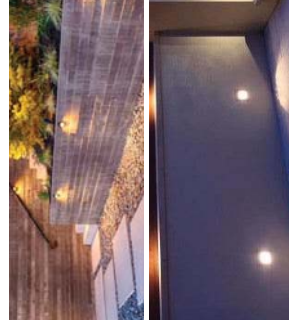

CONCRETE

Concrete is used in place flatwork and landscape walls. As extensions of the building forms, flatwork extends from the enhanced panels off of the building. Concrete is typically smooth, warm, and orthogonal.

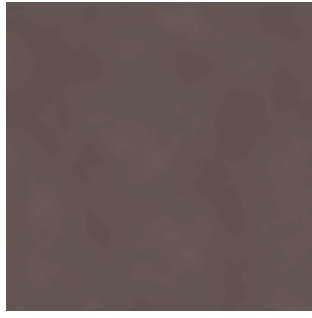

CONCRETE WALLS

Landscape walls are vertical extensions of flatwork with boardform texture, warm colors and sometimes integrated with steel.

METAL

Metal in the landscape is inspired by the need for protection from coastal influences. Anodized metal finishes will be used in railings, light fixtures, trellis structures, furniture and pottery.

WOOD

The use of wood is inspired by warmth of the material and its association with coastal boardwalks. The material will be hardwood grain in a sustainable finish and applied to walkable surfaces, furniture, walls and screen fencing materials.

STONE

The use of stone within the gardens is inspired by organic landscape forms and will be applied in enhanced flatwork areas within the podium and arrival gardens. The random flagstone will contrast with flatwork reflecting the building forms.

GRAVEL

Gravel stone will be used as mulch and pathways, bringing an organic natural finish to the gardens.

GLASS

Glass in the landscape will be used for wind protection, pool view preservation, patio fences, and guard rails with galvanized frames and post. Glass provides comfort and seclusion within in the gardens.

CONSTRUCTION KEY NOTES:

1. Milling - per Architect
2. Milling curbs - per Architect
3. Milling concrete slabs - per Architect
4. Grading - per Architect
5. Grading concrete - per Architect
6. Utilities shown on P&ID, including water, gas, and electric
7. Property line
8. Area shown - per CM Engineer
9. Hatched area - per Architect
10. Hatched area - per Architect
11. Area between (P) and (M) only
12. Hatched area on parking - per CM Engineer
13. Existing parking (P) and (M)
14. Existing wall (P) and (M)
15. Area shown (P) and (M)
16. Area shown (P) and (M)
17. Hatched area on parking - per CM Engineer
18. Existing building
19. Hatched area on parking - per CM Contractor

GENERAL CONSTRUCTION NOTES:

1. Confirm Work to requirements of latest edition of Uniform Building Code and applicable local and state codes, plans, specifications, conditions and regulations.
2. Prior to beginning work, license holder will verify all conditions, including underground utilities, and other items shown on drawings and in field. License holder will be held responsible for any conditions not shown on drawings and in field.
3. License holder shall coordinate with appropriate agencies to insure that materials, methods, and equipment used will comply with all applicable codes, ordinances, regulations, and requirements.
4. Do not proceed until Contractor's "Commencement of Work" drawings are received and have required public agency approval.
5. Verify property lines and locate all work prior to commencing work.
6. Refer to project specifications for additional information.
7. Obtain necessary permits and pay for related inspections from required to local Work.
8. Obtain necessary permits and pay for related inspections from required to local Work.
9. Obtain necessary permits and pay for related inspections from required to local Work.
10. Prior to building parking, refer to the project's general contract report. Report discrepancies between the general contract report recommendations and information stated in this Building Schedule.
11. Do not install permanent construction equipment unless it is shown on drawings and obtain necessary permits from local Work. Do not install permanent construction equipment unless it is shown on drawings and obtain necessary permits from local Work. Do not install permanent construction equipment unless it is shown on drawings and obtain necessary permits from local Work.
12. Be responsible for coordinating with other Contractors/Advisors/Engineers, General Contractor and other subcontractors, public agencies, and project design consultant.
13. Obtain all necessary permits and pay for related inspections from required to local Work.
14. Obtain all necessary permits and pay for related inspections from required to local Work.
15. Provide all existing grade sheets for parking deck, utility, and other related information.
16. Obtain all necessary permits and pay for related inspections from required to local Work.
17. Obtain all necessary permits and pay for related inspections from required to local Work.
18. Obtain all necessary permits and pay for related inspections from required to local Work.
19. Obtain all necessary permits and pay for related inspections from required to local Work.
20. Obtain all necessary permits and pay for related inspections from required to local Work.
21. Obtain all necessary permits and pay for related inspections from required to local Work.
22. Obtain all necessary permits and pay for related inspections from required to local Work.
